

THINGS TO KNOW:

1. Lab report must contain following sections: (order must be maintained)
 - a) Title /Question
 - b) Theory: The brief overview of the concept /techniques/syntax/idea/tools etc used
 - c) Steps and Commands: The steps performed along with involved commands
 - d) Output: Screenshot of the output
2. Output screen should be captured (use snipping tool), printed and attached in the report.
3. The output screen should reflect the unique identity of each students for that include the following things in commands (to print message in screen) and/or names and/ or paths :
 - Personal Information (Name, Roll No. and Section)
4. Contents should be written on single side of A4 sized paper.
5. Cover page and contents page should be attached in the report appropriately.
6. The works must be submitted within specified deadline.

Content Page Format

Subject: Database Administration

List of Lab Works

Lab No.	Title /Question	Submission Date	Signature
1(a)	This is sample title	2079/03/15	
1(b)	This is another title	2079/03/17	

Lab works / Part-2 / DBA/ BIT-6th semester

First Create PL/SQL stored procedure that displays the information about lab no. and your personal information in required places (CDB and PDB) and execute the stored procedure at beginning or end of the each lab task (for those lab works where SQL Plus is used)

Sample PL/SQL stored procedure:

```
CREATE OR REPLACE PROCEDURE my_information IS
BEGIN
    DBMS_OUTPUT.PUT_LINE('Name: Ram Prasad Sharma/Roll No.: 102 / Section: A');
END my_information;
/
```

Execution:

```
SET SERVEROUTPUT ON;
EXEC my_information;
```

8. User management with grant and revoke privileges

[Use worksheet in Sql Developer for following tasks]

- a) Display the information about users using DBA_USERS view
[Hints: In theory, write about DBA_USERS view]
- b) Create a user having name 'user_yourName' with passwords. [replace yourName with your name, if your name is Nisha then username should be 'user_nisha'.
- c) Grant the privileges like create session, create table etc to the user created in (b).
- d) Create a table after logging in through the user created in (b)
- e) Create another user (username should be yourName_yourSurname with tablespace clause.
- f) Create another user of your choice.
- g) Grant the privileges like create session, create table to the user created in (f)
- h) Change the password of user created in (b)
- i) Enable password expiration for the user created in (e)
- j) Grant CREATE SESSION privileges and other privileges like SELECT, INSERT, UPDATE, DELETE on table created in (d) to the user created in (e).
- k) Insert any two records to table created in (d), edit second record and select all records from the table by logging in through user created in (e).
- l) Revoke DELETE privilege on the table created in (b) from the user created in (e).
- m) Remove the user created in (f)

9. Working with roles and privileges

- a) Create a role named 'role_by_yourName'
- b) Grant some system privilege (like create table) and object privileges (like select, insert, update) to the role created in (a)
- c) Assign the role created in (a) to the user created in lab 8 (b).
- d) Write a command to view Roles Granted to any user in your system.
- e) Write a command to show the privileges granted to the role created
- f) Create another role of your interest and grant some privileges.
- g) Modify the role created in (f)
- h) Drop the role created in (f)

10. Working with Profiles

- a) Create a profile named 'profile_by_yourName' with various resource limits and password management policies.
- b) Assign the profile created in (a) to the user created in 8(b) or any other.
- c) Write a command to view different profile information in the system.
- d) Create another profile of your interest.
- e) Modify the profile created in (d) and display the updated profile information in system.
- f) Drop the profile created in (d) and display the updated profile information in system.
